

7th July 2015
**How to Reduce Temperature Related
Control System Downtime**
A free seminar presented by Rittal and CSS

Event Feedback:

***Very Informative, Excellent Speaker, Good Refreshments
... Steffan, Bisley
Interesting and Informative, Plenty of food for thought
... Tata
Excellent, Many Thanks
... Steve Blackwell, GE Oil and Gas***

The feedback received from the attendees to the seminar and the subsequent lively discussions confirms that the presentations struck a chord with engineers supporting control systems with environmental temperature issues – particularly doing the summer months.

However, if you were unable to attend the seminar, please take the time to grab a copy of the presentations from our website, www.controlsystems.co.uk/toohot

If you contact CSS with a panel cooling enquiry, don't forget to ask for a free magnetic thermometer – while stocks last.
